

Use **WHERE** clause with different conditions.

Use **ORDER BY**.

Display calculated fields like **Gross Salary**, **Tax Amount**, and **Net Salary**.

Gross Salary = Salary + HRA + DA + Bonus

Tax Amount = Gross Salary × Tax Rate

Net Salary = Gross Salary – Tax Amount

```
SELECT
EmployeeID,
FullName,
Salary,
HRA,
DA,
Bonus,
TaxRate,
(Salary+HRA+DA+Bonus) AS GrossSalary,
((Salary+HRA+DA+Bonus)*TaxRate/100) AS TaxAmount,
((Salary+HRA+DA+Bonus)-((Salary+HRA+DA+Bonus)*TaxRate/100)) AS NetSalary
FROM Employees;
```

Employees having SQL Skill

```
SELECT *
FROM Employees
WHERE FIND_IN_SET('SQL',Skills);
```

Employees joined after 2021

```
SELECT *
FROM Employees
WHERE JoiningDate>'2021-12-31';
```

Department then Salary

```
SELECT *
FROM Employees
ORDER BY Department, Salary DESC;
```

City then Name

```
SELECT *
FROM Employees
ORDER BY City, FullName;
```
